NEW REMOTE DIAGNOSIS PORTAL

With the **IDC5 CAR 76.6.1** version, TEXA has included a new portal for accessing the multi-brand diagnosis service, which allows repairers to complete operations that are not in the software updates or that may be complex. Thanks to this new, simple and intuitive portal, you can enter new requests other than always have visibility of the history of the requested operations.

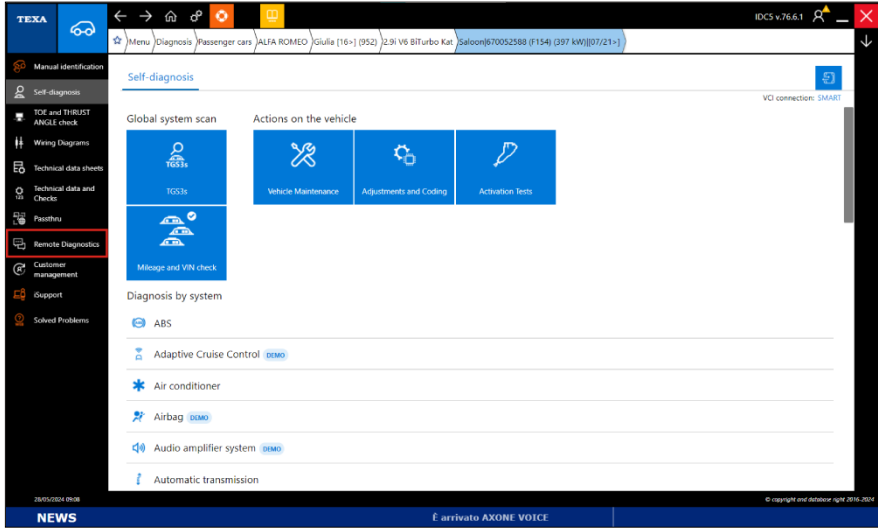

This portal and the related Remote Diagnosis service can be accessed by all customers who have subscribed a **TEXPACK CAR** subscription and who have created and validated an account in myTEXA portal.

NOTE: Based on the country of origin the subscription may vary for some services.

The portal can be reached from the IDC5 CAR environment in the diagnosis page by clicking on "**Remote Diagnosis**".

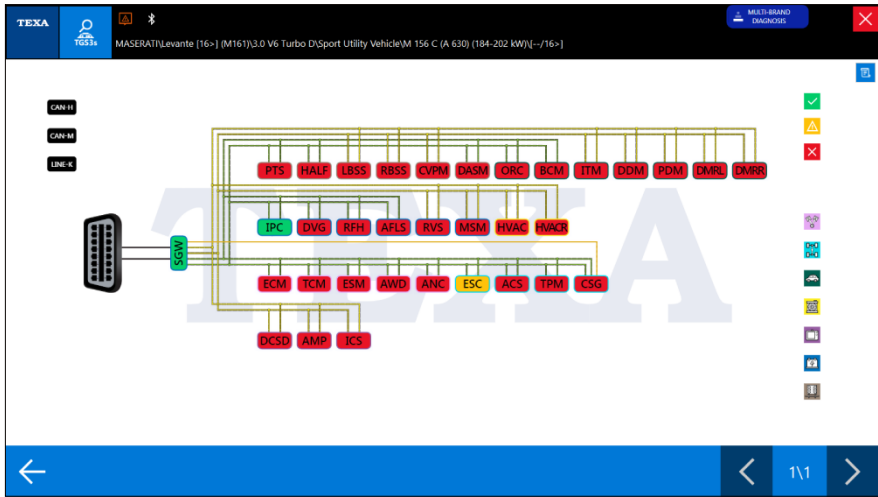

Furthermore, the portal can also be accessed in diagnosis from the menu on the left in the vehicle selection page clicking on **"Remote Diagnosis"**.
